SmartPack ThruPower

LIGHTING OF THE FUTURE... *ON A BUDGET*

Small and budget-conscious venues may think that the robust lighting created by combining electronic and conventional fixtures into one design is out of their reach, due to cost and circuiting challenges. *It's not.* ETC's compact SmartPack ThruPower dimmer lets you control a variety of loads all from one unit, without breaking your budget. A switch on the SmartPack transitions its output freely, from dimmed to relay to hot power.

Dimmed mode

Dependability. While set to 'Dim' mode, SmartPack ThruPower gives you the quality fades you'd expect from an ETC system. Incredibly easy to operate, it dims conventional sources smoothly and reliably.

Hot-output mode

Peace of mind. SmartPack ThruPower's hot-output mode is like an insurance policy for your LEDs. Flipping the switch to the 'On' position prevents a board operator from accidentally shutting off any equipment that requires constant power during a performance.

Relay mode

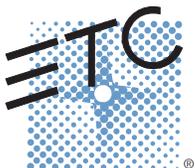

Security. When SmartPack ThruPower is in 'Relay' mode, the pack uses the patched DMX address to get the circuit to turn on and off the air-gap relay, while completely bypassing dimming and electronics.

Product features

- ThruPower features three modes: dimmed, switched or hot power output
- 12 x 10A compact wall-mount unit
- Easy-to-install connections
- Thirty-two built-in presets and sequencer for stand-alone operation
- Fully-rated hydraulic magnetic circuit breakers
- Capable of dimming multiple load types
- DMX512A and RDM compatible
- SmartLink® enabled
