# Desire D22™

SMALL SIZE, BIG ATTITUDE

## Every bit a Desire

At just eight inches long and weighing less than seven pounds, the D22 is ETC's smallest LED luminaire. But its compact footprint still features all of the professional-quality lighting traits that run in the Desire family: superior color, smooth dimming, quick setup, incredible efficiency, RDM capability and a user interface for customizable use.

## Larger-than-life color

With twenty-two emitters that create bright wash lighting, the D22 comes in four arrays: Studio Daylight for cool whites; Studio Tungsten for warm whites; Lustr®+, which uses the x7 Color System™ to achieve the most flexible range of whites, tints and bold saturated colors that an LED luminaire can produce; and Studio HD for variable-color-temperature whites.

## A little LED luminaire for any installation

The Desire D22 is available in three installation types: a portable version that accepts standard C-clamps, a canopy-mount design, and a track-mounted model. It can be used for permanent installations, fitting into the tightest spaces in lobbies, art galleries, theaters, museums or any location where larger fixtures can't go. And pairing the D22 with an ETC Source Four Mini™ creates a pocket-sized hybrid-lighting duo, with easy plug-and-play setups.
