Re: Architectural PAR 56 & PAR 64 lamps

Dear OSRAM Partner,

We regret to inform you that recent life testing of some of our large PAR lamps has yielded results that do not meet our standards. As a result we will have to do more development and further qualification testing before we feel the product is ready for the market. At this time we are temporarily blocking the part numbers below and cancelling all orders in place for them as we have no estimations on when we would be able to fill those orders. Once we again have product that we feel is ready for the market we will activate the parts and begin accepting orders. We thank you for your understanding of this difficult situation.
