

LITTLE BLIZZARD® XT/SP

- Higher output than previous models
- Available with sound proofing
- Fluffy, light, dry flakes
- Conservative on fluid
- Wide range variable output
- DMX on board

The Little Blizzard® XT creates large flakes that evaporate on contact. More volume control also increases or decreases size of the snow flakes. Unique design allows output to travel to greater distances than our competitors. Heavy duty powder-coating reduces noise. White flakes float further using less fluid.
