

GENERAL INFORMATION

Full-featured PC- and Mac-based lighting control application for use with conventional and moving lights, media servers and LED luminaires. An ETCnomad can be used with Eos software application, in a primary, backup, client or offline environment. To output to a lighting rig, the Eos software requires use of the ETCnomad key. When connected as a client, an ETCnomad lighting controller accesses the full output capacity of the connected system. Without the key, ETCnomad operates offline only.

Optional fader wings, programming wings, X-keys and compatibility with USB-MIDI panels allow extended and customizable control.

FEATURES

- 1,024 or 6,144 outputs
- ETCnomad lighting controllers can operate in a stand-alone, primary/backup and/or client environment
- When an ETCnomad lighting controller is connected as a client, output capacity is determined by the system it is connected to
- Net3/ACN/sACN and Artnet Ethernet lighting protocols
- DMX/RDM via ETC Gadget or Gadget 2
- DMX/RDM via Net3 DMX/RDM Gateways
- OSC Transmit/Receive
- UDP Transmit/Receive

IMPORTANT ETCNOMAD LIGHTING CONTROLLER ORDERING INFORMATION

A single universe of output may be distributed using an ETC Gadget or Gadget 2 USB to DMX/RDM converter. Up to four gadgets are supported. Additional or all outputs may be distributed via Ethernet protocols directly (Net3/ACN/sACN, or ArtNet) or by compatible Ethernet-distribution hardware, such as Net3 DMX/RDM Gateways. The Gadget and/or network equipment must be purchased separately from the ETCnomad Lighting Control kit.

Note: The ETCnomad lighting controller does not support ETCNet2/EDMX protocols.

Note: Eos software 2.8.X or below unlocks the base dongle at 512 outputs. Eos software 2.9 or higher unlocks the base dongle to 1,024 outputs.

Note: ETCnomad is also compatible with Cobalt and Hog4.
