Note: Please read entire manual before operating the G3000 Fog Effects Generator

# Introduction

The G3000 Fog Effects Generator is a Microprocessor Controlled, Water Based Fog generating system.

## Microprocessor Control

The G3000 features dual microprocessor control. From temperature regulation to taper back flow control, all of the functions are monitored and processed by the two on-board processors.

## Water Base Fog Technology

Water Base Fog technology is achieved by pumping a glycol/water mixture through a heat exchanger. This will vaporize the fluid as it passes through the processing block. The vaporization of the fluid forces the hot mixture through the output nozzle. When mixed with ambient air, it forms an opaque aerosol (fog). The fog is made up of tiny droplets that form around small particles in the air. The suspended droplets refract the light, allowing the fog to take on the color of the light illuminating it.

## Warning

### Important Safety Instructions:

1. Do not touch, place hands or expose skin within 20" (50 cm) of the discharge nozzle.
2. Do not remove the outer case.
3. Persons suffering from asthma or allergenic sensitivity may experience irritation, discomfort or allergic symptoms when exposed to fog effects.
4. Ensure that this unit is grounded at all times. Failure to do so may result in serious injury.
5. Use Ultratec Special Effects fluid **ONLY**.

## Safety Precautions

1. Ensure that any operation of the machine is supervised by suitably trained and authorized personnel.
2. Do not modify the machine or use a machine which has been damaged in any way.
3. Allow sufficient air circulation around the machine at all times.
4. Protect the machine from direct weather effects and wet locations.
5. Only use fluids manufactured by Ultratec Special Effects.
6. Do not continue to produce fog when visibility is reduced to 20" 50cm or below.
7. Avoid directing fog output continuously at people, structures or objects within close proximity of the discharge nozzle.
8. Ensure that adequate exhausting arrangements are available in the event of an emergency.
9. Do not place hands or exposed skin within the first 20" (50 cm) of the discharge nozzle at any time during fog production.
10. Fog effects can trigger smoke alarms and detectors. Please take suitable precautions to prevent false alarms.

# Technical Specifications

<b>Model:</b>	G3000 Fog Effects Generator
<b>Part Number:</b>	CLF 3000 - G3000 Fog Machine / 120 Volt CLF-3001 - G3000 Fog Machine / 120 Volt <sub>w/</sub> Air Option CLF-3002 - G3000 Fog Machine / 120 Volt <sub>w/</sub> Industrial Option CLF-3003 - G3000 Fog Machine / 220-240 Volt CLF-3004 - G3000 Fog Machine / 220-240 Volt <sub>w/</sub> Industrial Option CLF-3006 - G3000 Fog Machine / 220-240 Volt <sub>w/</sub> Air Option CLF-3007 - G3000 Fog Machine / 120 Volt <sub>w/</sub> Show Control CLF 3008 - G3000 Fog Machine / 105 Volt
<b>Length:</b>	25.38in 59.37cm
<b>Width:</b>	10.5in 26.67cm
<b>Height:</b>	10.63in 66.98cm
<b>Net Weight:</b>	41lbs 18.5kg
<b>Power Rating:</b>	120 Volt A.C. 50/60 Hz. 17 Amps. 240 Volt A.C. 50/60 Hz. 9 Amps.
<b>Fluid:</b>	Water Base Fog Fluid (Use only Ultratec Fluid)
<b>Features:</b>	2000w Dual Core Heating Block

## Technical Drawings

# Operating Procedure

1. The fog machine must be connected to a sine wave voltage supply of 20 Amps free of electrical interference.
2. Open a 4 Litre (1 Gallon) container of Ultratec Special Effects fog fluid and insert the fluid pickup tube into the spout of the fluid container.
3. Turn ON the Power switch located on the rear panel. The Power switch will illuminate to indicate the presence of power.
4. After approximately 9 minutes, the fog machine will be fully heated and ready for full output.
5. Set the demand from 1 to 100% using the built-in remote control or through a DMX control network.

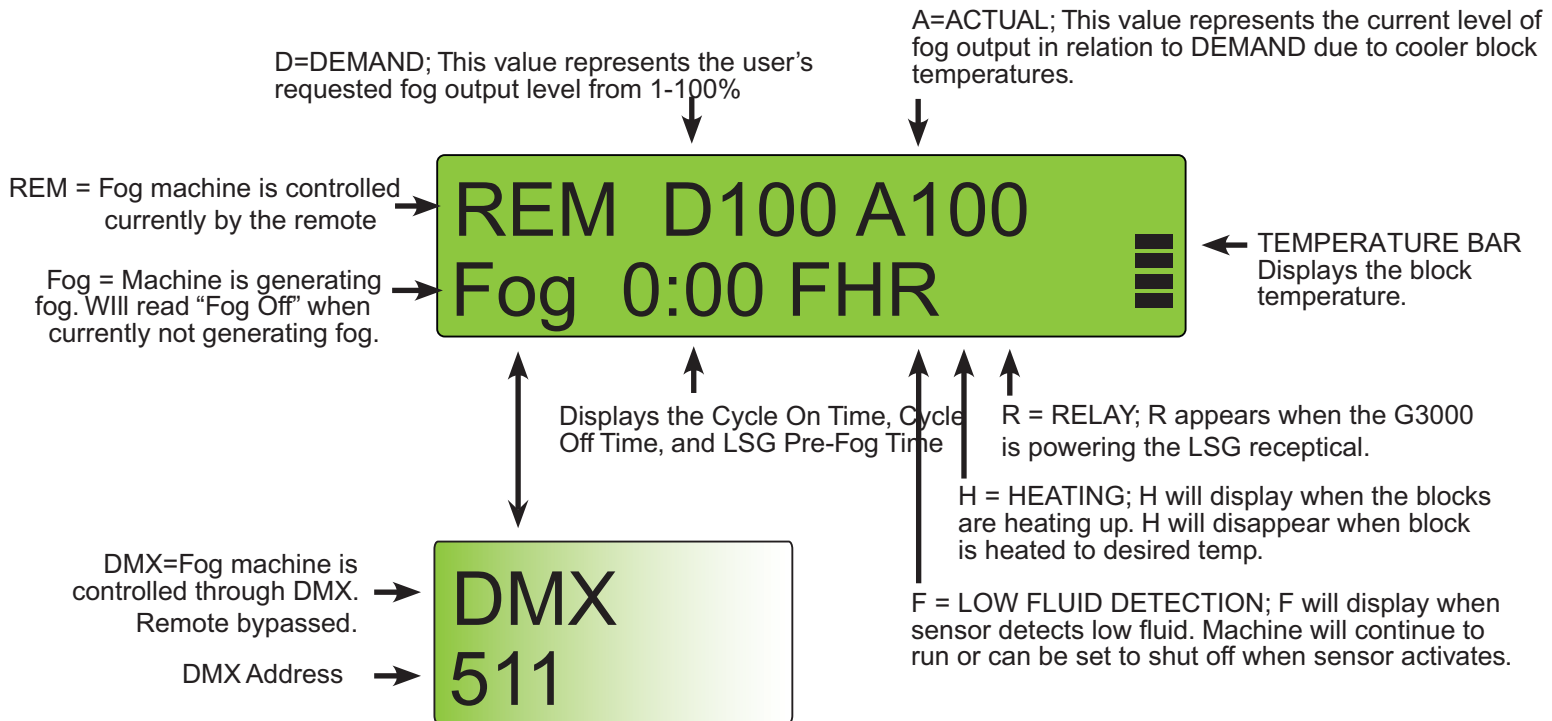

# Digital Remote Control

← *Diagnostics Screen Button  
Press "Menu" to exit  
(For Service Technician)*

## Write to Memory

When variables are changed on the digital remote they are written to memory after 60 seconds or when you change screens. The secondary displays return to the main menu if inactive for 60 seconds.

**CYCLE ON TIME**  
0:00 (mm:ss)

Set the desired time for the fog machine to run, using the "+" or "-" buttons. (0-10 Minutes)

**CYCLE OFF TIME**  
0:00 (mm:ss)

Set the desired time for the fog machine to stop, using the "+" or "-" buttons. (0-30 Minutes)

**LSG PRE-FOG TIME**  
0:00 (mm:ss)

When connected to an LSG, set the desired time for the LSG to purge the CO2 line before the G3000 begins to produce fog. (0-2 Minutes)

**DMX Address: 511**  
Data 0 D+1 0

Using the "+" or "-" buttons select the desired valid DMX address. (0-511)  
Data = fog rate controlled 0-100%,  
DMX+1=LSG power on above 50%.

## G3000 Screen Shots

Machine turned on warming up with no DMX input. Note temperature bar graph shows low, Heater "H" is on and fog is turned off DMX is unplugged and DMX LED (bottom left) is not on.

Note error from trying to turn on machine that is not yet hot enough.

Machine on with remote. Not fully heated (see temp bar and H is on) so requesting 100% but getting 27%.

Machine warming up with DMX attached. Note "DMX" on screen with dmx address show below set at channel 1. Note valid DMX red LED now on (lower left).

Machine on with DMX. Machine was fully heated (note bar graph) but heater starts for 100% Actual flow.

Menu screens for timer on/off function with remote control only. DMX control ignores these setting.

If set the Fog output stops when fluid gets low (F indicator on main screen).

DMX address selection screen. This shows DMX set to channel 1. Channel 1 data is 58 (0-255) channel 2 is 11.

**HIDDEN MENUS**

If set the Fog output stops when fluid gets low (F indicator on main screen).

Code versions for remote, output control, DMX.

Power up starting (use not recommended)

# DMX Operation

The G3000 is equipped with DMX control as a standard feature.

1. Attach a DMX signal to the DMX IN 5 pin connector on the rear of the unit. For good DMX practice, a terminator is used on the DMX OUT connector.
2. Select a valid DMX address on the digital remote. Data = fog rate controlled 0-100%, DMX+1=LSG power turns on above 50%.
3. Valid DMX LED is on solid if good DMX signal is present. DMX control overrides the digital remote. Slow or irregular flashing indicates a poor DMX signal.

## Other Features

### Remote Extension

The digital remote control can be undocked from the machine and extended by a 25' cord not supplied. This can be extended to 200'.

With the power off, press the tab located at the remote port left of the remote control. While pressing, pull the remote out of the dock and attach the cord.

### Fluid Level Detection

The G3000 is manufactured with an Electronic Fluid Level Detection to warn the user when the fluid has reached a low level. This information is fed to the digital remote control where it displays "F" when the fluid level becomes low. The machine will still run when the sensor detects low fluid. The machine can be set to shut down on the "Low Fluid Stop" screen so it will not run dry.

## Maintenance

### Exterior

The casing of the G3000 is stainless steel with a powder paint coating. To clean simply wash with mild soap and warm water.

### Heat exchanger

Using high quality Ultratec fluid should result in a long heat exchanger life. (See warranty policy later in this manual).

**Note: Cleaning/Rapid Change procedure can be found in the G3000 Service Manual located at:**

**[www.ultratecfx.com](http://www.ultratecfx.com)**

## Recommended Fluid

**Director's Choice Fog Fluid:** The choice of professionals. Director's Choice creates a cloud of fog with a medium hang time while remaining clean, white, dry, and odorless.

**Pro Beam Long Lasting Fog Fluid:** With a hang time 2-3x greater than the Director's Choice Fog Fluid, the Pro Beam solution produces a slightly less white fog while remaining clean, dry, and odorless.

**Quick Dissipating Fog Fluid:** This fast dissipating fluid is great for applications or effects that require quick dissipation of fog. It produces excellent steam effects that resemble nitrogen bursts and it also keeps low-lying fog from rising too quickly when it is used with the Eclipse Low Fog Generator or LSX.

**Extra Quick Dissipating Fog Fluid:** Dissipates 2x the rate of Quick Dissipating Fog Fluid while maintaining similar characteristics.

**Molecular Fog Fluid:** A faster dissipation versus the Director's Choice Fog Fluid. This thick, clean, white fog is an optimal solution for a dense low-lying fog effect when chilled with the Eclipse Low Fog Generator or LSX machines.

**Party Fog Fluid:** Quality fog fluid on a budget. An excellent solution for Djs, Nightclubs, Haunted Houses etc., looking to enhance light beams and creating various smoke effects.

**Maxi Fog Fluid:** The perfect balance between price and performance. Maxi Fog is the ideal solution for those who require high volume without compromise.

## Maintenance Fluid

**EZ Kleen Preventative Maintenance Fluid:** Using EZ Kleen preventative maintenance fluid on a regular basis ensures longer life for the heat exchanger in Ultratec fog machines by reducing blockage.

All our Fog Fluids are water based. Damage will occur if Haze Fluid is used in the G3000.

# Warranty

Hardware products come with a five-year warranty on parts and labor. If the unit in question has a material defect or fault that is caused in manufacturing, Ultratec Special Effects will provide free parts and labor to remedy the equipment. Ultratec Special Effects service department must be advised in a timely manner after defect appearance and the date of warranty request must be within five years of sale/purchase. Proof of sale and/or proof of purchase will be required for warranty to take effect.

Warranty service will be performed as follows: faulty parts will be repaired or replaced with the same or comparable parts, based on availability. Freight to our facility for warranty requests will be prepaid by the user/dealer. Upon completion of the repair, Ultratec Special Effects will return the unit via the most economical means available. Should you require the item express-returned, the user/dealer is responsible for indicating this request and for any difference in freight cost.

Warranty will be voided, and customer will lose all rights guaranteed by the warranty if any of the following are observed/occur:

If any non Ultratec Special Effects fluid is used at any point of operation.

If any adjustments or repairs are done to the machine in question by repair technicians not authorized by Ultratec Special Effects.

If our repair technicians observe any signs of incorrect handling/treating of machine in question.

Warranty services do not cause an extension of the warranty nor does a repaired product start a new warranty. This warranty only applies to the product supplied by Ultratec Special Effects, Ultratec Special Effects is not responsible for any losses, costs, or damages from the use of a defective product.

Any additional costs incurred are the responsibility of the Dealer and/ or the customer.

An RA (Return Authorization) number must be noted on the outside of each box being returned to our facility. Any package(s) without an RA number clearly marked, will not be accepted by our receiving department.

Export Distributors are required to carry out the warranty repair, parts will be supplied by Ultratec.

Please do not forget to remove any liquid from the machine when sending in for repair.

Please remember to include the RA Number on all items being shipped in for repairs.

To request a Return Authorization number please refer to our website - instructions below:

- 1) [www.ultratecfx.com](http://www.ultratecfx.com)
- 2) Click on the SUPPORT tab along the top of the screen
- 3) Click on REQUEST RMA from the pull down
- 4) Fill in the required information
- 5) Click on "SEND" button

If you have any questions or require assistance please contact service at 519-951-3355/866-534-5557 or by email at [Service@Ultratecfx.com](mailto:Service@Ultratecfx.com).
