

# The Snow Squall. Create a Winter Wonderland, Or Unleash a Fierce Blizzard.

Embodied by a one-piece, heavy-duty polymer plastic casing, the Snow Squall has a 220V - 7 Amp industrial blower. Hidden backstage, it can push artificial snow up to 30 feet. Once installed, the snow nozzle remains hidden in the scenery showering snow over the desired area. Maximize the snow effect by attaching the nozzle to our Swivel Bracket.

Two snow nozzles and two socks are provided allowing the user to create multiple snow effects. When not in use, lift the top lid and easily store the hose and snow nozzles in the hidden compartment.

*Our Northern Snow Fluid creates our fluffiest snow flakes. Ideal for large volume outdoor use, it works well with our Polar Vortex and Snow Squall. Use it to create everything from a light dusting to a heavy snowstorm.*
