

SolaPix 7 Luminaire DMX Channel Map

(Firmware Version 1.2.10 and Later)

Base Module		Flex/Macro Module		Pixel Module			
Channel	Function	Channel	Function	Channel	Function	Channel	Function
1/2	Pan	1	Flex/Macro Mode	1	Pixel 1 - Red	17	Pixel 5 - Red
3/4	Tilt	2	Flex/Macro Speed	2	Pixel 1 - Green	18	Pixel 5 - Green
5	Color Mode	3	Flex/Macro Crossfade	3	Pixel 1 - Blue	19	Pixel 5 - Blue
6	Red	4	Flex/Macro Strobe Mode	4	Pixel 1 - White	20	Pixel 5 - White
7	Green	5	Flex/Macro Strobe	5	Pixel 2 - Red	21	Pixel 6 - Red
8	Blue	6	Flex/Macro 1 - Red	6	Pixel 2 - Green	22	Pixel 6 - Green
9	White	7	Flex/Macro 1 - Green	7	Pixel 2 - Blue	23	Pixel 6 - Blue
10	Color Correction	8	Flex/Macro 1 - Blue	8	Pixel 2 - White	24	Pixel 6 - White
11	Section Selection	9	Flex/Macro 1 - White	9	Pixel 3 - Red	25	Pixel 7 - Red
12	Module Priority	10	Flex/Macro 2 - Red	10	Pixel 3 - Green	26	Pixel 7 - Green
13/14	Zoom	11	Flex/Macro 2 - Green	11	Pixel 3 - Blue	27	Pixel 7 - Blue
15	Strobe Mode	12	Flex/Macro 2 - Blue	12	Pixel 3 - White	28	Pixel 7 - White
16	Strobe	13	Flex/Macro 2 - White	13	Pixel 4 - Red		
17/18	Dimmer	14	Flex/Macro 3 - Red	14	Pixel 4 - Green		
19	mSpeed	15	Flex/Macro 3 - Green	15	Pixel 4 - Blue		
20	Fan Speed	16	Flex/Macro 3 - Blue	16	Pixel 4 - White		
21	Control	17	Flex/Macro 3 - White				

Notes

Due to the modular control and individual module addressing of the SolaPix 7, there are six recommended library layouts.

We suggest that console libraries follow these guidelines:

1. Base Module
2. Flex Module
3. Pixel Module
4. Base + Flex + Pixel Modules
 - a. Base Control is on the master fixture number.
 - b. Flex/Macro Mode, Flex/Macro Speed, and Flex/Macro Crossfade (Flex addresses 1-3) should all be included on the master fixture number.
 - c. Pixel Modules should start with Pixel 1 as the .1 address.
 - d. Flex/Macros 1 through 3 (Flex addresses 4-15) should be compound addresses .8, .9, .10.
 - e. Flex/Macro and Pixel RGBW control options utilize virtual console dimming when available. The dimmer control in the Base Module is a master over all output including Base, Flex, and Pixel Modules.
5. Base + Flex Modules
 - a. Base Control is on the master fixture number.
 - b. Flex/Macro Mode, Flex/Macro Speed, and Flex/Macro Crossfade (Flex addresses 1-3) should all be included on the master fixture number.
 - c. Flex/Macros 1 through 3 (Flex addresses 4-15) should be compound addresses .1, .2, .3.
 - d. Flex/Macro RGBW control options utilize virtual console dimming when available. The dimmer control in the Base Module is a master over all output including Base and Flex Modules.
6. Base + Pixel Modules
 - a. Base Control is on the master fixture number.
 - b. Pixel Modules should start with Pixel 1 as the .1 address.
 - c. Pixel RGBW control options utilize virtual console dimming when available. The dimmer control in the Base Module is a master over all output including Base and Pixel Modules.

		Reserved	236	255	93%	100%				
<p>Note: To change "Idle" or "Slow to fast" ranges (0-100%), you can use a fader or go directly to the target range value. To change "Standard" or "Studio" ranges, you must start at value 0 and go directly to the target range value. After a pause of approximately 3 seconds, the action occurs. The "Standard" and "Studio" control settings are retained in the fixture's memory and will override any settings that were previously made in the fixture's user interface. "Slow to fast" is not retained and is only active while the fixture is receiving a DMX value in this range.</p>

Notes

1. Face Layout: Pan = 128 DMX; Tilt = 40 DMX
 (Note how the fixture head is oriented in relation to the pan and tilt locks.)

Pixels

Rings

Sectors

2. DMX Fixture Orientation
 Tilt Movement Range: 255°
 Pan Movement Range: 540°
 Pan and tilt lock locations are highlighted.

3. RDM Manufacturer ID: 0x4C52
 RDM Device ID (Base): 0x587
 RDM Device ID (Flex/Macro): 0x588
 RDM Device ID (Pixel): 0x589

Revision History

Revision	Date	Changes
H	Jan-2022	Expanded the function range of channel 12, Module Priority, in the Base Module to include Pixel and adjusted the corresponding values accordingly.
G	Mar-2021	Corrected several Tilt values in the Base Module: Function Range is now 0° to 255° (was 0° to 277°), Range Low is now -127.5 (was -135), and Range High is now 127.5 (was 135). Corrected the Tilt Movement Range in Note 2 from 270° to 255°.
F	Dec-2020	Changed the Controller Default value for the Pan and Tilt channels from 32512 to 32767. Updated the DMX Fixture Orientation illustration to correct the "0 DMX" and "255 DMX" Pan values, which had been swapped. Removed the mSpeed information from the document.
E	Aug-2020	Added firmware version information to the document title.
D	Aug-2020	Added additional information to the notes for the Fan Speed channel (channel 20 in the Base Module) to clarify that the Fans Mode setting in the fixture UI is overridden by the Standard and Studio control settings.
C	Mar-2020	Added 5 - Color Mode to the Base Module. Added 4 - Strobe Mode and 5 - Strobe to the Flex/Macro Module. Added DMX Fixture Orientation graphic to the Notes. Added Independent Base Intensity and Master Base Intensity to the Control channel.
B	Nov-2019	On page 1, changed "Macro" to "Flex/Macro" and changed "Zone Selection" to "Section Selection". In the Flex Module table, changed "Zone" to "Flex/Module". Updated the Base Module table to include Ring 3 information. Updated the graphic in the Notes to add a graphic of the fixture and remove Pixel numbers from the Ring and Sector graphics.
A	Oct-2019	Initial release.
